

3. Intro to Tech

3.1 Introduction

The TDI Intro to Tech course introduces students to the world of technical diving. This course is designed as an introductory course to the TDI Advanced Nitrox course and the TDI Decompression Procedures Course. The objective of this course is to familiarize students with technical equipment configurations, to enhance open water diving skills (such as buoyancy, trim, and situational awareness), and to introduce students to advanced gas planning techniques within a no-decompression context. This course is strictly a no-decompression course; students are permitted to use enriched air nitrox (EAN) mixes, provided the gas mix is within their current level of certification. Intro to Tech may be combined with TDI Advanced Nitrox at the discretion of the instructor.

3.2 Qualifications of Graduates

Upon successful completion of the course, graduates may engage in diving activities in a technical equipment configuration without direct supervision provided:

1. The diving activities approximate those of training
2. The areas of activities and environmental conditions approximate those of training

Graduates may enroll in:

3. TDI Advanced Nitrox Course
4. TDI Decompression Procedures Course

3.3 Who May Teach

1. Procedure One

A current and active status SDI Open Water Scuba Diver Instructor or TDI Nitrox Instructor who has completed a TDI Intro to Tech Instructor course conducted by a TDI Intro to Tech IT may be registered to teach.

2. Procedure Two

An active status SDI Open Water Scuba Diver Instructor or TDI Nitrox Instructor who holds the ratings of TDI Advanced Nitrox and Decompression Procedures Diver certifications, or equivalent, may apply for an administrative upgrade to teach

3.4 Student to Instructor Ratio

Academic

1. Unlimited, so long as adequate facility, supplies and time are provided to ensure comprehensive and complete training of subject matter

Confined Water (swimming pool-like conditions)

1. N/A

Open Water (ocean, lake, quarry, spring, river or estuary)

1. A maximum of 6 students per instructor; it is the instructor's discretion to further reduce this number as conditions dictate

3.5 Student Prerequisites

1. Minimum age 18, 15 with parental consent
2. Minimum certification an SDI Open Water Scuba Diver or equivalent
3. Provide proof of 25 logged open water dives

3.6 Course Structure and Duration

Open Water Execution

1. A minimum of 3 dives must be conducted; All dives must be conducted at depths within the diver's current level of certification but no dives should exceed 23 metres / 75 feet
2. If the TDI Intro to Tech is taught in conjunction with Advanced Nitrox, only a total of 4 dives are required; more may be conducted at the discretion of the instructor

Course Structure

1. TDI allows instructors to structure courses according to the number of students participating and their skill level

Duration

1. The minimum number of classroom and briefing hours is 6

3.7 Administrative Requirements

Administrative Tasks:

1. Collect the course fees from all the students
2. Ensure that the students have the required equipment
3. Communicate the schedule to the students
4. Have the students complete the:
 - a. *TDI Liability Release and Express Assumption of Risk Form*
 - b. *TDI Medical Statement Form*

Upon successful completion of the course the instructor must:

1. Issue the appropriate TDI certification by submitting the TDI Diver Registration Form to TDI Headquarters or registering the students online through member's area of the TDI website

3.8 Training Material

Required material;

1. *TDI Intro to Tech Manual*
2. *TDI Intro to Tech PowerPoint Presentation*
3. *TDI Intro to Tech Instructor Guide*

4. *TDI Intro to Tech* Instructor Resource CD

Optional material;

1. *TDI Advanced Nitrox Diving* Manual
2. *TDI Decompression Procedures* Manual

3.9 Required Equipment

The following equipment is required for this course:

1. Primary cylinder(s) cylinder volume appropriate for diving conditions and diver gas consumption
2. Primary regulators
 - a. Primary and alternate second stage required on all primary cylinder(s)
 - b. Submersible pressure gauges are required on all primary cylinder(s)
3. Depth gauge and automatic bottom timer and/or dive computer
4. Buoyancy compensator device appropriate for equipment configuration
5. Ascent reel with lift bag/surface marker buoy
 - a. Appropriate for maximum planned depth
 - b. Lift bag with at least 11 kg / 25 lbs of lift
6. Exposure protection appropriate for local diving condition
7. Slates / wet-notes

3.10 Required Subject Areas

Instructors may use any materials they feel help in the presentation of the required subject areas. The following topics must be covered during the course:

1. Physics
 - a. Pressure review
2. Physiology
 - a. Ascent/descent rates
 - b. Hyperthermia
 - c. Hypothermia
 - d. Psychological aspects
3. Equipment Considerations
 - a. Single/double cylinder(s); valve options
 - b. Regulator options
 - c. Harness/BCD options
 - d. Computer, bottom timer, depth gauge options
 - e. Reels/spools options
 - f. Lift bag/surface marker bag options
 - g. Exposure protection options
 - h. Minimum equipment, bring only what is needed

- i. Stream lining and stowing equipment
4. Dive Planning
 - a. Tables/computer dive planning and execution
 - b. Surface air consumption (SAC) rate calculations
 - c. Minimum gas reserve calculations for no-decompression dives
 - d. Environmental considerations
5. Procedures
 - a. Entry/exit strategies
 - b. Emergency strategies in case of gas failure/loss
 - c. Ascent/descent strategies

3.11 Required Skill Performance and Graduation Requirements

Students are required to successfully complete the following open water skills:

Land drills:

1. Selection and preparation of equipment
2. Conduct team oriented skills (buddy checks) for lift bag deployment
3. Gas matching among buddy teams
4. Demonstrate familiarity with basic hand signals
5. Demonstrate adequate pre-dive planning with limits based on the team and personal gas consumption

Pre-dive drills:

1. Use S.T.A.R.T. before every dive
2. Stress analysis and mitigation

***START is S-drill (OOA drill and Bubble Check), Team (buddy equipment checks), Air (gas matching), Route (entry/exit and planned path underwater), Tables (depth, duration, waypoints and schedule).**

In-water drills:

1. Weight check
2. Demonstrate adequate buoyancy control (ability to hover at fixed position in water column without moving hands or feet)
3. Demonstrate adequate trim (ability to maintain horizontal during the descent, bottom and ascent portion of the dive)
4. Demonstrate no-silting propulsion techniques: frog kick, modified frog kick, modified flutter kick, backwards kick
5. Demonstrate the ability to perform the following exercises while maintaining trim and buoyancy in the water column:
 - a. Regulator exchange
 - b. Regulator recovery
 - c. Mask partial flood and clear with minimal air loss
 - d. Mask removal and clear with minimal air loss

-
6. Demonstrate the ability to perform a safety drill (S-drill) while maintaining trim and buoyancy in the water column
 7. Demonstrate the ability to perform a valve drill while maintaining trim and buoyancy in the water column (if double cylinders are being used)
 8. Demonstrate the ability to deploy a surface marker buoy or lift bag while maintaining trim and buoyancy in the water column
 9. Show good situational awareness

In order to complete this course, students must:

1. Complete all open water requirements safely and efficiently
2. Demonstrate mature, sound judgment concerning dive planning and execution
